Mark Scheme (Results)
Summer 2014

Pearson Edexcel GCSE in Biology (5BI2F) Paper 01

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

Summer 2014

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( \mathbf { i } ) \mathbf { 1 }}$ | oxygen |  | $\mathbf{( 1 )}$ |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( i ) 2}$ | clot |  | (1) |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 1(a)(ii) | A description including any two from the following: <br> - defend against disease/infection(1) <br> - \{by engulfing /destroying/digesting\} \{pathogens/bacteria/ microorganisms/viruses/ foreign particles\}(1) <br> - produce antibodies(1) <br> - produce antitoxins(1) | Allow fight infection <br> I gnore germs | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( b )}$ | A description including any two <br> of the following: |  |  |
| - (overall) decrease (1) <br> (blood pressure) in arteries <br> goes up and down / <br> fluctuates/ shows pulse(1) <br> pulse/fluctuation becomes <br> less (as it flows towards <br> capillaries)(1) | Allow increases and decreases | Ignore references to pressure in <br> veins and capillaries | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( c )}$ | An explanation including two of <br> the following: | MAX 1 if there is no reference to <br> left or right side |  |
| - left ventricle has a thicker <br> wall (1) | left ventricle pumps blood <br> ord the body/further <br> distance (1) <br> muscle/ left side <br> right ventricle pumps <br> blood to the lungs/shorter <br> distance (1) <br> idea of different blood more muscle <br> pressures (1) | (2) |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( a )}$ | 23 (breaths per minute) |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( b )}$ | One mark for any of the <br> following: <br> (Student Y) exercising harder <br> /faster/carried out a different <br> exercise <br> (Student Y) has a smaller lung <br> capacity/ greater mass/is less fit <br> (Student Y's) breathing rate <br> started higher | Accept: Any reasonable <br> suggestion | ORA |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( c )}$ | An explanation linking : |  |  |
| • (more) oxygen needed (1) <br> $\bullet$ (aerobic) respiration (1) <br> (greater) energy demand <br> (1) | Ignore references to anaerobic <br> respiration |  |  |
| • to remove (excess) carbon <br> dioxide(1) |  | (2) |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( d )}$ | B diffusion |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 2(e) | not enough oxygen <br> (reaching muscles) (1) <br> - anaerobic respiration(1) |  | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( f )}$ | C glucose |  | (1) |

(Total for question 2 = $\mathbf{8}$ marks)

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 3(a)(i) | Any two linked statements from the following: <br> - focusing wheel (1) <br> - for sharper/more clear image (1) <br> OR <br> - more/better/stronger (objective) lenses (1) <br> - greater magnification(1) <br> OR <br> - electric light (1) <br> - brighter/clearer image (1) <br> OR <br> - stage/stage clips(1) <br> - holds the slide steady(1) <br> OR <br> - light underneath (1) <br> - brighter/clearer image/ light goes through the slide (1) | Ignore 'more detail' as this is in the question | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( a ) ( i i )}$ | B - an electron microscope |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( a ) ( \text { iii }}$ | A cell membrane |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :---: | :--- | :--- |
| $\mathbf{3 ( b ) ( i )}$ | $\bullet 30 \div 0.1(1)$ | Award 2 marks for correct bald <br> answer | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( b ) ( i i )}$ | contains genetic <br> information/genes/DNA/ <br> chromosomes/controls the <br> activities of the cell/cell reactions |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( c )}$ | A description including two of <br> the following points |  |  |
| - provides support (to <br> plant/ cell)/gives cell its <br> shape( 1) <br> stores cell sap (1) <br> (containing) minerals / <br> sugar / named <br> sugar/amino acids (1) | Accept: stores water/nutrients |  |  |

(Total for question 3 = 9 marks)

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(a)(i) | A description including two of <br> the following: |  |  |
|  | -(sex cells) are haploid (1) <br> - sex cells/gametes fuse(1) <br> chromosomes <br> combine/mix (1) <br> to form a diploid cell (1) <br> Accept reference to cells <br> containing half the number of <br> chromosomes <br> Accept: male sex/sperm cell joins <br> with female sex cell/egg cell | Accept reference to a cell <br> containing the full number of <br> chromosomes | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(a)(ii) | (cell) differentiation | Allow: specialisation | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(a)(iii) | D proteins |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(b)(i) | $180(\mathrm{mg})$ |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(b)(ii) | A description including: |  |  |
| - (mass) increases (1) | manipulation of <br> data/correct reference to <br> specific point(s) from the <br> graph e.g. mass increases <br> most rapidly between 80 <br> and 120 days(1) | Ignore growth | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{4 ( c )}$ | A description including two of <br> the following: |  |  |
|  | • mitosis (1) <br> - DNA/chromosomes are <br> copied (1) <br> e cells (produced)(1) <br> (daughter) cells are <br> genetically identical (1) <br> cells are diploid(1) | Credit reference to other stages <br> of mitosis | Accept clones |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(d) | A suggestion including two of the <br> following: |  |  |
|  | - to produce <br> poisons/chemicals/ <br> pesticides (1) <br> to resist herbicides (1) <br> - to contain more nutrients <br> (1) <br> faster growing (1) <br> - more tolerant to harsh <br> conditions e.g. drought (1) | Accept to reduce deficiency <br> disease |  |
|  | increased yield (1) | Accept other reasonable <br> suggestion e.g. increased shelf- <br> life | (2) |

(Total for question 4 = 11 marks)

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( a ) ( i )}$ | An explanation including two of <br> the following: |  |  |
|  | - (into) root hair cells(1) <br> - by active transport(1) <br> using energy(1) <br> against a concentration <br> gradient/(from a low <br> concentration in the soil) <br> to a high concentration (in | Ignore diffusion <br> the plant cell)(1) | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 5(a)(ii) | D xylem vessels |  | (1) |

| Question Number |  | Indicative Content | Mark |
| :---: | :---: | :---: | :---: |
| QWC | *5(b) | A explanation to include some of the following points <br> Structure/feature: <br> - large surface area <br> - contains stomata/pores <br> - controlled by guard cells <br> - contains air spaces <br> - chloroplasts <br> Processes: <br> - carbon dioxide in/out <br> - oxygen in/out <br> - water (vapour) in/out <br> - diffusion (of gases) <br> - from a high to low concentration (of gas) <br> - reference to photosynthesis/respiration/ environmental factors /transpiration <br> - concentration gradient of carbon dioxide maintained (by chloroplasts) | (6) |
| Level | 0 | No rewardable content |  |
| 1 | 1-2 | - a limited explanation that mentions one structure OR one gas OR one process e.g. carbon dioxide moves into the le the leaf has stomata <br> - the answer communicates ideas using simple language a limited scientific terminology <br> - spelling, punctuation and grammar are used with limited accuracy | named or <br> uses |
| 2 | 3-4 | - a simple explanation that links a structure to a named ga carbon dioxide enters through the stomata OR a structur named process e.g. gases diffuse through air spaces <br> - the answer communicates ideas showing some evidence and organisation and uses scientific terminology appropria <br> - spelling, punctuation and grammar are used with some a | e.g. <br> to a <br> clarity <br> ely <br> curacy |
| 3 | 5-6 | - a detailed explanation that links BOTH $\mathrm{CO}_{2}$ and $\mathrm{O}_{2}$ to stom At least one other structure and/ or process linked to gas exchange will be included. <br> - the answer communicates ideas clearly and coherently us range of scientific terminology accurately <br> - spelling, punctuation and grammar are used with few err |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( c ) ( i )}$ | $\mathbf{1 4 ( \mathbf { c m } ^ { 3 } )}$ |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 5(c)(ii) | A description that linking either: |  |  |
|  | - temperature / $\mathrm{CO}_{2}$ <br> concentration/water (1) <br> correct reference to named <br> factor being increased (1) | Ignore light/sunlight <br> Accept a method describing how <br> named factor could be increased | (2) |

(Total for question 5 = 12 marks)

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- | :--- |
| $\mathbf{6 ( a ) ( i )}$ |  | Reject if more than one <br> line drawn from <br> enzyme |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 6(a)(ii) | C lock and key |  | (1) |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 6(b)(i) | A explanation including two of the following: <br> - (baby food) contains proteins (1); <br> - (protease) breaks down/digests proteins(1); <br> - into amino acids (1); <br> - amino acids can then be absorbed(1); <br> - reference to growth(1); | Accept large/ insoluble molecules <br> Accept small/ soluble molecules | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( b ) ( i i )}$ | An explanation including two of <br> the following: |  |  |
|  | - less/no activity/not at <br> - optimum(1); <br> enzyme/active site <br> changes shape(1); <br> cannot bind to <br> substrate(1); <br> denatures(1); | Accept destroyed |  |$\quad$| (2) |
| :--- |

| Question Number |  | Indicative Content | Mark |
| :---: | :---: | :---: | :---: |
| QWC | *6(c) | A description that links some of the following points <br> - carbohydrase breaks down carbohydrates <br> - to maltose/glucose/sugar <br> - carbohydrase in small intestine/ mouth <br> - reference to amylase <br> - lipase breaks down fats <br> - to fatty acids/glycerol <br> - in the (small) intestine | (6) |
| Level | 0 | No rewardable content |  |
| 1 | 1-2 | - a limited description that gives one correct link between an enzyme and its substrate OR product OR location e.g. carbohydrases in the mouth <br> - the answer communicates ideas using simple language and uses limited scientific terminology <br> - spelling, punctuation and grammar are used with limited accuracy |  |
| 2 | 3-4 | - a simple description that gives one correct link between one enzyme, its substrate, product and its location e.g. carbohydrases break down carbohydrates to glucose in the small intestine OR two enzymes with their substrates and either the products OR location <br> - the answer communicates ideas showing some evidence of clarity and organisation and uses scientific terminology appropriately <br> - spelling, punctuation and grammar are used with some accuracy |  |
| 3 | 5-6 | - a detailed description that links BOTH enzymes with their substrates AND their products AND their location. <br> - the answer communicates ideas clearly and coherently using a range of scientific terminology accurately <br> - spelling, punctuation and grammar are used with few errors |  |

(Total for question 6 = 12 marks)
