## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk for our BTEC qualifications.
Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

If you have any subject specific questions about this specification that require the help of a subject specialist, you can speak directly to the subject team at Pearson.
Their contact details can be found on this link: www.edexcel.com/teachingservices.

You can also use our online Ask the Expert service at www.edexcel.com/ask. You will need an Edexcel username and password to access this service.

## Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www. pearson.com/uk

GCSE Biology 5BI 2F/ 01 Mark Scheme - November 2012

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( a )}$ | $\bullet$ diploid (1) <br> $\bullet$ chromosomes (1) <br> correct order (1) |  |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( b )}$ | C - growth |  | $\mathbf{( 1 )}$ |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( c ) ( i )}$ | An explanation including two of <br> the following points <br> - undifferentiated / <br> unspecialised (cells) (1) <br> can change into any type <br> of (body) cell (1) <br> can be used (in research) <br> to grow new tissues/ <br> repair damaged tissue / <br> organs (for transplant)/for <br> treatment/cure for genetic <br> disease (1) | Named genetic disease/valid <br> disease e.g. Parkinson's/diabetes | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :---: | :--- | :--- |
| $\mathbf{1 ( c ) ( \text { ii) }}$ | $\bullet 4 \times 30(1)$ | Allow one mark for a given <br> calculation that includes any <br> number $\times 30=$ their correct <br> answer e.g. $16 \times 30=480$ <br> Bald answer 120 (minutes)(2) | (2) |
|  | $\bullet 120$ (minutes) (1) |  |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( d )}$ | B - clones |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 2ai | D - produce a clear detailed <br> image |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :---: | :--- | :--- |
| $\mathbf{2 ( a ) ( i i )}$ | $\bullet 0.005 \times 400(1)$ | Bald answer 2(mm)(2) | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( b )}$ | (releases) energy | Reject: stores energy <br> Accept: (aerobic) respiration <br> Reject: anaerobic respiration | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{2 ( c ) ( i )}$ | B-osmosis |  | $\mathbf{( 1 )}$ |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 2(c)(ii) | A description including two of the <br> following points |  |  |
|  | - chloroplasts contain <br> chlorophyll (1) <br> - fhich absorb (sun)light (1) <br> - for photosynthesis (1) <br> (1) | takes in/traps (sun) light | Accept: starch <br> Ignore: food |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( a ) ( i )}$ | A description including the <br> following points |  |  |
| - increases to midday/in the <br> morning (1) <br> decreases from midday/ in <br> the afternoon/to 6pm (1) | increases and then decreases (1) <br> reference to highest rate around <br> midday (1) | (2) |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( a ) ( i i )}$ | two of the following points | mineral ion concentration |  |
|  | - light (levels) (1) | cloudy <br> too hot/ cold <br> - temperature (1) <br> (later (levels) (1) | carbon dioxide <br> (concentration)(1) |
|  |  | Reject: (change of) seasons as <br> 12 hour period in question | (2) |
|  |  |  |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :---: | :--- | :--- |
| $\mathbf{3 ( a ) ( \text { iii) }}$ | 1 carbon dioxide/ $\mathrm{CO}_{2} ;$ <br> oxygen $/ \mathrm{O}_{2} ;$  | Ignore: sunlight/light energy <br> Reject: $\mathrm{CO}^{2}$ or $\mathrm{O}^{2}$ or any other <br> variation in formulae from that <br> given | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( b ) ( i )}$ | $\bullet 100 \times 20(1)$ | Bald answer $2000\left(\mathrm{~m}^{2}\right)(2)$ | (2) |
|  | $\bullet 2000 \mathrm{~m}^{2}(1)$ |  |  |

| Question Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 3(b)(ii) | A description including any three of the following points <br> - use a quadrat/select smaller area of the field (1) <br> - place quadrat randomly/select areas randomly (1) <br> - count the number of plants in each quadrat/location (1) <br> - reference to use of several locations (1) <br> - calculate average number of plants from quadrats/ samples (1) <br> - multiply sample size up to the total area of the field (1) | Accept: multiplied by $2000 \mathrm{~m}^{2}$ (from 3bi) | (3) |

| Question | Answer |  |  |  |  | Mark |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 4(a)(i) | A | T | A | G | C |  |
|  |  |  |  |  |  |  |
|  | T | A | T | C | G |  |
|  | TAT (1)CG (1)Must be in correct order |  |  |  |  | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{4 ( a ) ( i i )}$ | (weak) hydrogen / H (bonds) |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(b)(i) | In any order: | chromosomal (DNA) (1) | circular (DNA) <br> Ignore: <br> circle/ring/chromosome(s) <br> named plasmid |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(b)(ii) | give instructions to make <br> proteins | Accept controls activities <br> /characteristics of the cell | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| 4(c) | An explanation including any <br> three of the following points |  |  |
| Protein may have: <br> - different amino acids (1) <br> different order of amino <br> acids (1) <br> a different <br> shape/structure (1) <br> a different function/not <br> function correctly(1) | References to change in active <br> site (of enzymes) | Ignore: references to mutations <br> (as in the question) <br> Ignore: denaturing | 3) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( a ) ( i )}$ | vein / vena cava | pulmonary vein <br> Reject: pulmonary artery | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( a ) ( \text { ii) }}$ | An explanation including any two <br> of the following points |  |  |
| -valves (1) <br> between the atria and <br> ventricles/in arteries <br> leading away from heart <br> (1) <br> (valves) only open one <br> way <br> (valves) close (when blood <br> flows backwards) (1) Accept: named valves | Ignore: prevents from flowing <br> backwards (as in the question) | (2) |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( b )}$ | A suggestion including any two of <br> the following points |  |  |
| - the heart has two |  |  |  |
| - sides/left and right side (1) |  |  |  |
| destination of blood from |  |  |  |
| one side e.g. left side |  |  |  |
| pumps to body (1) |  |  |  |
| type of blood from one |  |  |  |
| side e.g. right side pumps |  |  |  |
| deoxygenated blood(1) |  |  |  |$\quad$| Accept: one side pumps blood to |
| :--- |
| the body/lungs |
| Accept: one side pumps |
| oxygenated/deoxygenated blood |$\quad$ (2) |  |
| :--- |

| Question Number |  | Indicative Content | Mark |
| :---: | :---: | :---: | :---: |
| QWC | *5(c) | An explanation including some of the following points in a logical sequence <br> - increased muscle contraction <br> - blood is pumped faster around the body/to muscles <br> - more oxygen/glucose delivered to cells/muscles <br> - for aerobic respiration <br> - which releases energy <br> - rate of gas exchange increases <br> - more carbon dioxide in the blood <br> - more oxygen inhaled/into body <br> - more carbon dioxide exhaled/from body <br> - reduce build up of lactic acid | (6) |
| Leve $1$ | 0 | No rewardable content |  |
| 1 | 1-2 | - a limited description of the reasons why heart or breathing rate increase with exercise e.g. blood flows faster or more oxygen is needed <br> - the answer communicates ideas using simple language and uses limited scientific terminology <br> - spelling, punctuation and grammar are used with limited accuracy |  |
| 2 | 3-4 | - a simple description that links an increase in heart rate with increased blood flow and an increase in breathing rate with increased oxygen uptake <br> - the answer communicates ideas showing some evidence of clarity and organisation and uses scientific terminology appropriately <br> - spelling, punctuation and grammar are used with some accuracy |  |
| 3 | 5-6 | - a detailed description linking an increase in heart rate AND breathing rate to an increase in blood flow and oxygen uptake. A link to aerobic respiration and/or energy demand is made. <br> - the answer communicates ideas clearly and coherently uses a range of scientific terminology accurately <br> - spelling, punctuation and grammar are used with few errors |  |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( d )}$ | B - lactic acid |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( a ) ( i )}$ | (Label) B |  | (1) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 6(a)(ii) | A description including any two from the following points <br> - movement of food/ peristalsis(1) <br> - release of enzymes (1) <br> - breakdown/digestion of food (1) <br> - absorption/diffusion of small/soluble molecules (1) <br> - into the blood (1) | named digestive enzymes named nutrients <br> absorption/diffusion of food/nutrients | (2) |

| Question <br> Number | Answer | Acceptable answers | Mark |
| :---: | :---: | :---: | :---: |
| 6(b) | An explanation including three of the following points <br> - amylase is an enzyme (1) <br> - (amylase) breaks down/digests starch (1) <br> - to maltose/sugar (1) <br> - maltose/sugar is a small/ soluble molecule (1) <br> - (and can) diffuse through the wall of the visking tubing (1) | glucose for maltose/ sugar <br> allow 'pass through' for diffusion | (3) |

| Question <br> Number |  | Indicative Content | Mark |
| :---: | :---: | :---: | :---: |
| QWC | *6(c) | A description including some of the following points in a logical sequence <br> mouth <br> - teeth chew food/break food down into smaller pieces <br> - increasing its surface area <br> - (and) mixes food with saliva so it can be swallowed more easily <br> - enzyme action in mouth / references to named enzymes? <br> - tongue helps to roll food into a ball/bolus (so it can be swallowed more easily) <br> oesophagus <br> - swallowing <br> - muscular contractions/peristalsis in oesophagus <br> - pushes/moves food towards the stomach <br> stomach <br> - contraction of muscle tissue in the stomach mixes food with acid and digestive juices <br> - enzyme action in stomach / references to named enzymes? <br> - hydrochloric acid contributes to the breakdown of food | (6) |
| Leve $1$ | 0 | No rewardable content |  |
| 1 | 1-2 | - a limited description which is likely to be restricted to one or two processes in one area only e.g. teeth chew food or saliva helps food to be swallowed. <br> - the answer communicates ideas using simple language and uses limited scientific terminology <br> - spelling, punctuation and grammar are used with limited accuracy |  |
| 2 | 3-4 | - a simple description that describes one process in at least two areas e.g. food is chewed in the mouth and pushed down the oesophagus to the stomach. <br> - the answer communicates ideas showing some evidence of clarity and organisation and uses scientific terminology appropriately <br> - spelling, punctuation and grammar are used with some accuracy |  |
| 3 | 5-6 | - a detailed description that describes most of the processes in at least two areas and includes the action of enzymes in the mouth or stomach <br> - the answer communicates ideas clearly and coherently uses a range of scientific terminology accurately <br> - spelling, punctuation and grammar are used with few errors |  |
